Wiring One Xi800.4 to One Pair Exile Tower Speakers

Below is the best way to hook up one Xi800.4 to power one pair of Exile tower speakers. The Xi800.4 is a four channel amplifier that will also operate in “Bridged 2CH” configuration. This essentially makes the Xi800.4 a very powerful two channel amp that delivers maximum performance.

**TERMINAL SIDE**

![Amplifier terminal diagram]

4 gauge power and ground required.

Left Speaker

Right Speaker

**SIGNAL SIDE**

![Amplifier signal diagram]
